**Subject:** This Settlement Stinks

I can't believe what I've read this morning about the settlement and MS being forced to (expand its market share by) expanding into

MS putting software/equipment into schools only makes schools depend on the microsoft system. Education is one area that MS does not completely dominate. Please reconsider your settlement.

Thats only one point of contention out of very, very many

Thanks DOJ, You're handing MS more money and power on a silver platter.
